journal of MEMBRANE SCIENCE

Contents

Gas permeation properties of plasma polymerized thin film siloxane-type membranes for temperatures up to 350°C
S. Nehlsen, T. Hunte and J. Müller (Hamburg, Germany) 1
The influence of a low-molecular hydrophobic solute on the flux of polysulphone ultrafiltration membranes with different cut-off
J. Lindau, A.-S. Jönsson and R. Wimmerstedt (Lund, Sweden) 9
Glucose-sensitive membrane coated porous filters for control of hydraulic permeability and insulin delivery from a pressurized reservoir
S. Cartier (Massy, France), T.A. Horbett and B.D. Ratner (WA, USA) 17
Irreversible thermodynamics of transport across charged membranes. Part V. Isothermal transport through anion-exchange membranes and macroscopic resistance coefficients
A. Narębska, A. Warszawski, S. Koter (Toru, Poland) and T.T. Le (Hanoi, Viet Nam) 25
Irreversible thermodynamics of transport across charged membranes. Part VI. Frictional interactions and coupling effects in transport of acid through anion exchange membranes
A. Narębska, S. Koter, A. Warszawski (Toruń, Poland) and T.T. Le (Hanoi, Vietnam) 39
Dense hydrophilic composite membranes for ultrafiltration
S.P. Nunes, M.L. Sforça (Campinas, SP, Brazil) and K.-V. Peinemann (Geesthacht, Germany) 49
Concentration and fractionation of polyvinyl alcohol-anionic surfactant stabilised latex dispersions by microfiltration
R.J. Wakeman and G. Akay (Exeter, United Kingdom) 57
Simulation of the structure and filtration performance of granular porous membranes
G.A. Davies and X. Jia (Manchester, United Kingdom) 67
Porous cellular ceramic membranes: a stochastic model to describe the structure of an anodic oxide membrane
J. Broughton and G.A. Davies (Manchester, United Kingdom) 89
Separation of a biocatalyst with ultrafiltration or filtration after bioconversion
G.W. Meindersma, J. Augeraud and F.H.P. Vergossen (Geleen, Netherlands) 103
Permeation mechanism of DNA molecules in solution through cuprammonium regenerated cellulose hollow fiber (BMM™)
T. Hirasaki, T. Sato, T. Tsuboi, H. Nakano, T. Noda (Tokyo, Japan), A. Kono (Fukuoka, Japan), K. Yamaguchi (Yamaguchi, Japan), K. Imada (Miyazaki, Japan), N. Yamamoto (Tokyo, Japan), H. Murakami and S. Manabe (Fukuoka, Japan) 123
Extraction and separation of scandium from rare earths by electrostatic pseudo liquid membrane
X.-J. Yang, Z.-M. Gu and D.-X. Wang (Beijing, China) 131
Surface modification of an ultrafiltration membrane with crystalline structure and studies on interactions with selected protein molecules
S. Weigert and M. Sára (Wien, Austria) 147
Critical particle-to-pore size ratio in ultrafiltration
A.N. Cherkasov and A.E. Polotsky (St. Petersburg, Russia) 161
Polyvinyl alcohol–polyacrylamide interpenetrating polymer network membranes and their pervaporation characteristics for ethanol–water mixtures
L. Liang and E. Ruckenstein (Buffalo, NY, USA) 167
Comments on: sigmoidal swelling profiles for temperature responsive poly(*N*-isopropylacrylamide-*co*-*n*-butylmethacrylate) hydrogels [J. Membrane Sci., 89 (1994) 267–77]
A.M. Dave, U.H. Vaishnav, B.V. Ankleshwaria, A.C. Shah and M.H. Mehta (Baroda, India) 183
Response to comments by Dr. A.M. Dave et al.
T. Okano (Tokyo, Japan) 187
Response to comments by T. Okano et al.
A.M. Dave, U.H. Vaishnav, B.V. Ankleshwaria, A.C. Shah and M.H. Mehta (Baroda, India) 189
Response to 2nd Comments by Dr. A.M. Dave et al.
T. Okano (Tokyo, Japan) 191

New results in metal working wastewater treatment using membrane technology
M. Belkacem, H. Matamoros, C. Cabassud, Y. Aurelle (Toulouse, France) and J. Cotteret (St. Symphorien D'Ozon, France) 195
Transport of glycine by neutralization dialysis
G. Wang, H. Tanabe and M. Igawa (Yokohama, Japan) 207
Catalytic polymeric hollow-fiber reactors for the selective hydrogenation of conjugated dienes
H. Gao, Y. Xu, S. Liao, R. Liu, J. Liu, D. Li, D. Yu, Y. Zhao and Y. Fan (Dalian, People's Republic of China) 213
A lumped parameter mathematical model of a hollow fiber membrane device for the controlled insulin release
S. Todisco, V. Calabro′ and G. Iorio (Rende CS, Italy) 221
Spinning of hollow fiber ultrafiltration membranes from a polymer blend
I.M. Wienk, F.H.A.O. Scholtenhuis, Th. Van den Boomgaard and C.A. Smolders (Enschede, Netherlands) 233
An ATR-FTIR study of water in cellulose acetate membranes prepared by phase inversion
D. Murphy and M.N. De Pinho (Lisboa Codex, Portugal) 245
Precise static and dynamic permeation measurements using a continuous-flow vacuum cell
J.M. Watson and M.G. Baron (Manchester, United Kingdom) 259
Screw-thread flow promoters: an experimental study of ultrafiltration and microfiltration performance
H.R. Millward, B.J. Bellhouse and G. Walker (Oxford, United Kingdom) 269
Surface characterization of polyelectrolyte complex membranes based on sodium cellulose sulfate and poly(dimethyldiallylammonium chloride)
J. Lukáš (Prague, Czech Republic), K. Richau, H.-H. Schwarz and D. Paul (Teltow-Seehof, Germany) 281
